The process of raising your Tarnished Sword to become an Elden Lord begins with the most basic level of creating a character. Your Tarnished Sword determines your personality and the skill of your sword. Liberty Hall (Carthage, Missouri) Liberty Hall, also known as the Carthage Masonic Memorial Hall is located in Carthage, Missouri. It is said to be the largest Masonic building in Missouri. Built in 1853 at 75 N Main St, it was renamed while it was still being constructed. The public dedication of the building occurred on December 13, 1853, which was then dedicated to the memory of all of those who held religious persecution under the Missouri Compromise. Until then, no public buildings had been erected in that area. The building was constructed as a Masonic lodge for the expansion of the city and to serve as a meeting place for the abolitionist movement. It boasts a clock tower which oscillates to the bells of the city's Second Baptist Church. It is most notably noteworthy that it was destroyed by fire in 1919. On September 23, 1986, it was added to the National Register of Historic Places. Gallery References

Svetlin Ilyuts "You must be Tarnished," "The Elden Ring," "A Bestiary of Monsters" "The game draws you in from the beginning. It gives you a wonderful background to Tarnished. I don't know if I would have even accepted this game if I had known what it was going to be about. The first ten minutes are absolutely phenomenal. It covers the history of Tarnished and the setting and introduces all of the characters who will be going to be your allies. They're unique. The world is unique. The story is not a story that is in linear fashion, but its own little world. Every step you make seems like a separate journey. I can easily say that this is the game that you start playing once you've finished your first dungeon. It goes from a puzzle dungeon in the beginning to an action RPG dungeon, where you're finally fighting. It's a very beautiful game. I want to play it once a day until the end." Egidio Ilyuts "Impressive" "The Elden Ring" "First of all, I want to thank you for offering such a fantastic game that seeks to live up to the genre and not follow the tradition. It's very rare to find a game that has an epic story, immense graphics, detailed maps, and a beautifully-rendered world that's so similar to the New Fantasy RPG. I also want to tell you about your game. It is one of the most atmospheric game I've played in a long time. The graphics and the story are great. However, what really gets me is the story. The game not only takes a look back at the history of Tarnished, but it also touches upon it in the future as well. I believe that the heart of what Tarnished is is a very special story that is expressed through time. I believe that this is very important, in particular, when it comes to games that are looking back at the history of a specific genre. I really felt in the first two hours that there was a need for a story like this. I truly believe that this is the game that you should play. It's truly impressive!" Dmitry Ilyuts "A real gem" "The Elden Ring" " bff6bb2d33

Comes the end to the story of Dr. Rex Nebular's life, and the upcoming reboot. Finishing the story of Unveil: The Final Chapter will be shut down indefinitely, except as a one-shot in event. I will not decide any further who should or should not find this story interesting. This is for myself rather than for any other person. I have been very busy with my main blog, and this blog will be a thing of the past.

1. Field of the Invention The present invention relates to a video apparatus, particularly to a video apparatus that can produce a clean recording on a video tape of which a running direction is defined.

2. Description of the Prior Art In a video apparatus such as a video tape recorder (VTR), a tape cassette which is mounted in the video apparatus is transported while the tape cassette being rotated, so that a recorded video signal is reproduced through an exclusive reproduction apparatus connected to the video apparatus. A so-called magnetic tape is usually employed as a recording medium in such a VTR. The video signal is recorded on the recording medium while the recording medium is transported, for example, at a speed 1.5 times the normal speed of the recording medium. If the recording medium is transported along its center, the recording medium should be transported at the same speed as the running speed of the recording medium. However, if the running speed of the recording medium is slightly changed, the recorded video signal cannot be properly reproduced. To eliminate this drawback, the video apparatus includes a capstan motor that rotates the tape cassette at a predetermined speed and a pinch roller that drives the tape cassette along with the capstan motor. The video apparatus further includes a capstan transport roller driven by a capstan motor for transporting the recording medium, and a pinch roller driven by a pinch roller motor for transporting the recording medium along with the capstan transport roller. The pinch roller motor rotates both the capstan motor and the pinch roller at the predetermined speed. Therefore, the video apparatus can transport the recording medium at the predetermined speed. The pinch roller should not stick to the capstan motor.

Therefore, the pinch roller should be disposed in a position where it is movable away from the capstan motor. The pinch roller is usually supported by a pinch roller supporting member, which is supported at three positions on a pinch roller supporting chassis. The pinch roller supporting member is supported so that it can swing in a horizontal direction. The pinch roller supporting member is guided in a horizontal direction by a guide member fixedly disposed between the pinch roller supporting chassis and the pinch roller supporting member. When a tape cassette is inserted into
